CRB Custom Split-Grip Handle Kits

These handle kits have been set up to ease in the component selection for building this latest fad in Freshwater and light Saltwater handles. While split grips have been around for years it has taken the market by storm over the past few years. Every major rod manufacturer is offering a general rod series with these types of handles. These kits include the rear grip, foregrip, fighting butt with composite trim, reel seat, polyurethane reel seat arbor and an assortment of 6 winding checks to cover installation on just about any blank model.

Key	Stock#	Type	Reel Seat	Butt Grip	Rear Grip	Foregrip

I.	SGK-9	Casting	American Tackle SCRTH 18	2.5"	4"	3.5"
J.	SGK-10	Casting	American Tackle SCRTH 20	2.5"	4"	3.5"

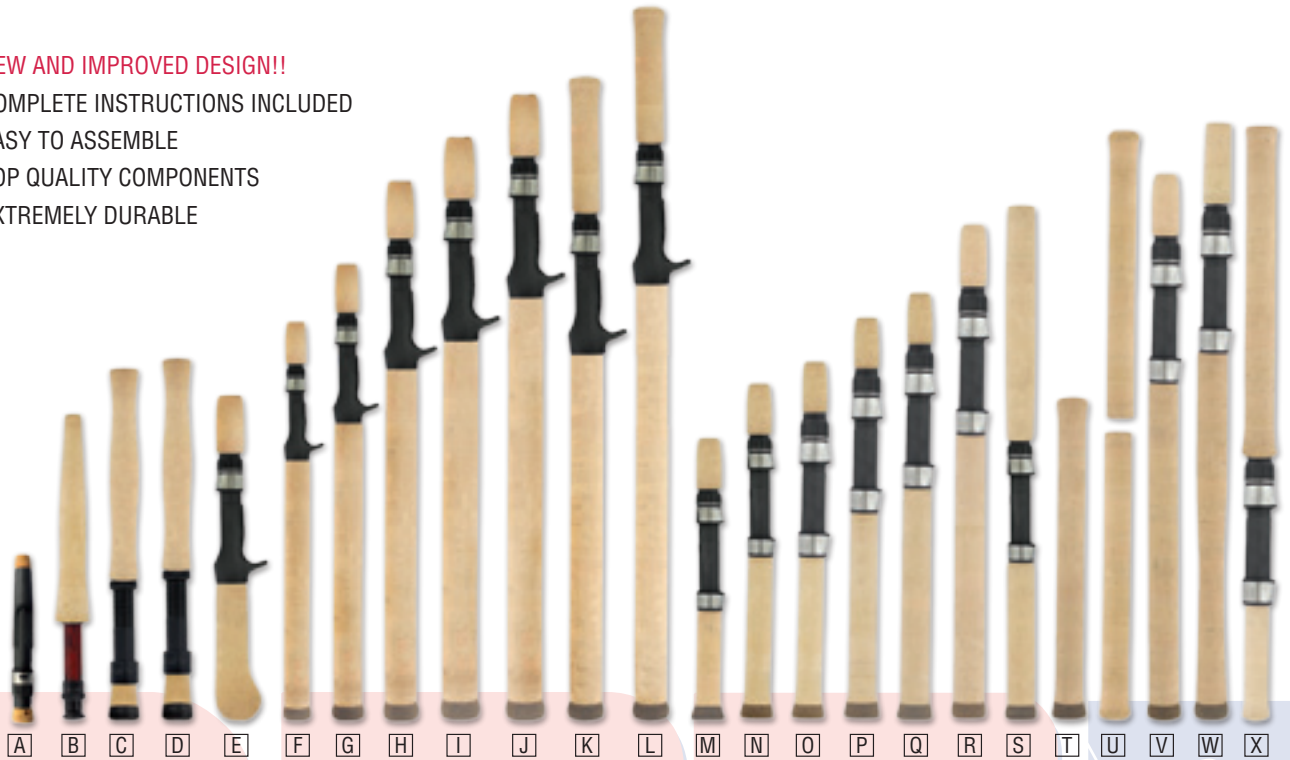

All CRB Handle Kits Are Packaged With Header Card & Complete Directions.

CRB Custom Fly Handle Kits

With the introduction of the 1pc. Fly Series and the new Switch and Spey Lines in the MHX Blank Line we have developed the following new handle kits. The HKF-5 is a Big Game Full Wells grip with over-size fighting butt. The HKF-6 is an 11" Switch Rod grip with a 4 3/4" Rear. The HKF-7 is a 12" Spey Foregrip with 4 3/4" rear and the HKF-8 is a 14" Spey Fore grip with 5 3/4" Rear. All Grips are super grade cork and the Switch and Spey models come with American Tackle AL8-L2 double locking nut anodized aluminum reel seat. These handle kits are designed for the serious fishermen with functionality and fit in mind.

Key	Stock#	Type	Reel Seat	Length	Rear/Butt	Foregrip
A.	HKF-5	Big Game	American Tackle AL8 Aluminum Fly Seat	18"	2.5"	7.5"

LHC

Rod Builder's Handle Assembly Clamp

Ideal for clamping rod handles during drying. Ensures your handle does not loosen and stays put while it cures. Particularly useful for EVA and foam handles that typically expand while they dry. To use, simply place your rod's butt cap in the PVC end cap and stretch the securing ring to the end of the foregrip or winding check. Leave it on your rod to cure overnight for tighter handles.

Stock#

LHC

Rod Builder's Sanding Screen

This Silicon Carbide sanding screen can be cut into smaller segments and used to sand down cork, foam and other grip materials on a rod lathe. Size is 10 meters x 38mm or approximately 33' long x 1.5" wide. Includes a convenient storage box.

SS-180

SS-180

Steel Turning Mandrel Wax

Mandrel Wax Parting Agent is a release compound produced from a combination of hydrocarbon and microcrystalline waxes. It is particularly recommended as a primer coat to create a smooth, compatible mandrel surface prior to turning handles.

NOTE: With Mandrel Wax, 5-Minute epoxy may be used to secure cork or EVA materials while turning.

Burl Cork Block & Strips

Now offering 1.5" X 1.5" 12" long SOLID blocks of Exotic Burl Cork, ready to turn and finish. Burl Cork blocks offer numerous options over a standard ring based layout such as:

- No more rings to glue, no more glue lines, no more clamping and waiting for adhesive to cure.
- All blocks are pre-bored to 1/4" to eliminate drilling/boring on your part.
- Unlike cork rings which visually show the same pattern around the circumference of the grip, these blocks will exhibit a visual change in grain structure around the circumference of the grip...just like natural wood does, because it's a solid piece...not identical rings. The 0 and 180 degree axis will exhibit one grain pattern, and the 90 and 270 degree axis will exhibit a different grain pattern.

Colors available: Brown (1), Red (2), Green (3), Blue (4), Natural (5), Light Mix (6), Dark Mix (7), Burnt (8)

MHCJ-KIT

Cork Inlay Creation Kit

This kit includes all the tools and supplies you'll need to start creating your own custom fishing rod cork handle inlays.

This kit includes these items:

- MCHJ-1 cork slicing and checkerboard jigs
- Precision cork cutting saw with 12 blades
- 24-piece cork assortment
- Elmer's wood glue

Stock #

MHCJ-KIT

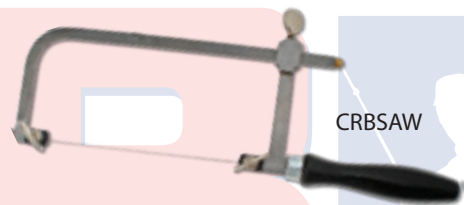

Cork Jig Sawblades

MHSABLADES

These Swiss-made sawblades combine excellent sharpness, flexibility and reliability. A package of blades will give you consistent results, a true mark of a superior sawblade. These blades are outstanding for precision cork-jig cutting. Their superfine cutting teeth reduce the amount of wasted material and provide a crisp edge for your custom cork inlays. 12 per package.

Stock#

MHSABLADES

CRBSAW

Cork Jig Saw

This saw is outstanding for precision cork-jig cutting. The blades' superfine cutting teeth reduce the amount of wasted material and provide a crisp edge for your custom cork inlays. Sold with a package of 12 replacement blades.

Stock#

CRBSAW

Cork Ring Slicing Jig

The custom builder cork slicer and checker board cutting jigs (MHCJ-1) are all that you will need to create the ultimate in custom cork and EVA handles. With these two jigs you will be able to slice cork or EVA into discs of 1/8" or smaller and cut rings into checkerboard wedges 1/4, 1/6, 1/12 of the diameter of the ring.

MHCJ-1

Cork Slicer

The Cork Slicer is designed to handle standard 1 1/4" cork, burl & colored rings without a center hole. The slicer is designed to cut 1/8" slices out of the rings. In using different types of shim materials you can cut the slices as thin as 1/32". These discs make beautiful accents when added to cork of a contrasting color.

Checkerboard Cutting Jig

The Checkerboard cutter is made with 12 vertical slices which allow you to cut your cork, burl or colored ring into a variety of pie shapes which can be assembled into many different designs.

Stock#

MHCJ-1

MHCRT8

8" Cork Zip Ties

8" cork ring ties, use them to secure cork wedges together while the glue cures. 25 Cork Zip Ties per pack.

Stock#

MHCRT8

E701

Rod Builders Cork Inlay Glue

Cleans up easily with warm water before curing. Great for gluing up cork rings. Grabs fast but can be repositioned. Easy water cleanup, safe and non-toxic.

Custom Rod Builder Blanks

These high quality rod blanks are comparable to the offerings from major name brand manufacturers. Because of a bulk-purchasing agreement with a major manufacturer we cannot disclose the source, but we promise you'll build great rods on them. These models are constructed of the new industry-standard IM6 graphite (44 million modulus) to guarantee a high-strength low-weight rod. All of these blanks are finished in gloss black, pink, purple, blue or green and carry a lifetime warranty. These blanks are a great bang for your buck.

PROKÖTE® & PROPASTE®

Formulated by Rod Builders, for Rod Builders

Developed "For Rod Builders – By Rod Builders" – the ProKöte® and ProPaste® products are the results of years of testing and development, crafted by a lifetime of experience in custom rod building. These fantastic new products were developed from scratch to be the absolute best rod building finishes and epoxies money can buy.

The Difference is CLEAR • UV Stable • Flexible • Crystal Clear

ProKöte® Rod Finish

Designed "For Rod Builders – By Rod Builders" – Experienced rod builders know what they want in a rod finish: extended working time, easy leveling, good bubble release, thread saturation, ultimate clarity and protection from UV yellowing. ProKöte™ answers these needs while providing the industry's first medium build epoxy. ProKöte™ rod finish has been tested to be the #1 epoxy.

Bubble Buster™

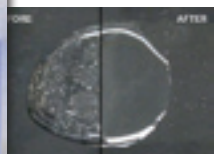

Specially formulated for rod builders to release and help remove the bubbles that occur when applying 2-part epoxy finish to your rods. CRB Bubble Buster™ works by releasing the surface tension of the 2-part epoxy, allowing the encapsulated bubbles to rise and burst. The CRB Bubble Buster™ leaves no residue after application and works with all brands of 2-part rod finish epoxy.

Gaff Blanks Specification Chart

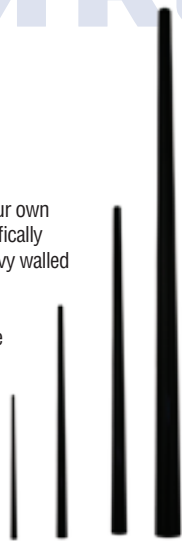

Custom Builder™ Gaff Blanks

- Powerful E-Glass Gaff Handle
- Specifically Designed to be a Gaff Handle
- Spiral cut grooves

CRB is excited to offer the components to enable you to build your own High Quality custom gaffs. We have designed Gaff Handles specifically made for gaffs. Not just a rod blank to stick a hook into but a heavy walled handle with spiral cut grooves inside the front end to give you a better hold on the hook. All Gaff Handles are available in 5'6" lengths to allow you to build a 6' completed gaff or cut the handle to any desired length to make it perfect for the application you need.

We have supplied a chart with the outside dimensions of the Gaff Blank to enable you to order the correct handle I.D. to fit after you have trimmed it to your desired length.

Gamefish Rod Decals

Measure 2" x 1" and can be placed directly on rod and finished (decals are self-adhesive). Many of our decals now feature "laser cut" edges which eliminates excess decal film around the image. This means clear & black backgrounds are a thing of the past. Full Color, net cut.

Gyotaku Fish Decals by Marshall Madruga

All decals are full-color and printed in UV-resistant ink, as well as laser cut for minimal background color. Decal sizes vary by the fish, but are approximately 1". Artist-designer, Marshall Madruga created this special product line by combining his lifestyle and unique artwork. Marshall Madruga is a master in the Japanese technique of Gyotaku (gyo=fish / taku=impression). Paint is applied to a REAL FISH and then the fish is printed on a special Japanese rice paper. Using a REAL FISH keeps the artwork anatomically correct and very unique. Marshall has printed everything from marlin and tuna to trout and bass.

Color Spectrum Group
RED

Color Swatch

Color Name
319- Redfish
P: 1795 C G: 326

Color Number
3 19

First Digit indicates color spectrum group; e.g. 3- Reds, 4- Blues, etc.

Second & Third Digits indicates color shade. The lower the number the lighter the shade; the higher the number the darker the shade.

P - Represents the closest Pantone™ color association (colors may vary)

G - Represents the closest associated Gudebrod™ thread color

Making it easy for rod builders to select just the right colors, we proudly introduce the "Color Number System™" or CNS for short – which provides the rod builder the ability to easily identify colors and shades of colors based on their numbering.
